

David L. Robertson: Robertson Racing, Owner

Mr. Robertson was elected to the Board of Trustees for Embry-Riddle Aeronautical University in March of 2009 and serves as Chair of the Flight Safety and Education committee.

Robertson was chief pilot, director of training, and director of operations at Spirit Airlines before becoming its director of flight safety.

Presently, team owners of Robertson Racing, Robertson and his wife, Andrea, now focus much of their time and energy into competing in some of the world's most prestigious sports car races.

A professional pilot for more than 30 years, Robertson's experience has ranged from gliders, air ambulances, scenic tours, and on-demand charters to aerial applications, firefighting, and jet airliners. He has held such positions as captain, instructor, and check airman at four domestic and international airlines, with additional responsibilities in personnel, flight safety, and federal safety and health compliance. Currently Robertson is involved with the FAA FOQA (Flight Operational Quality Assurance) Demonstration Project, which is collecting and analyzing flight data recordings to improve the safety of flight operations, air traffic control procedures, and aircraft and airport design and maintenance.

Robertson is a member of the Advisory Council of Embry-Riddle's Center for Aerospace Safety/Security Education. He is a life member of AOPA and the Soaring Society of America. He is also an active member of the Flight Safety Foundation, American Institute of Aeronautics and Astronautics, American Society of Safety Engineers, EAA Warbirds and International Aerobatic Club, Classic Jet Aircraft Association, and the Society of Automotive Engineers.
