

Embry-Riddle Aeronautical University

2018 Science Speaker Series

The seminars of this series are intended for undergraduate students, faculty and members of the community interested in the sciences. Please come if you are interested in learning something about the universe, our home. If you are a student considering graduate studies or research opportunities, you are particularly encouraged to attend.

Talks will take place in the DLC Auditorium (new location)

Pizza and soft drinks will be provided!

Friday January 19th, 12:00 pm

Dr. David Sand

Assistant Professor of Astronomy, University of Arizona

“Unveiling the Physics and Progenitors of Cosmic Explosions with a One Day Cadence Supernova Search”

Friday February 9th, 12:00 pm

Dr. Gerrick Lindberg

Assistant Professor of Chemistry, Northern Arizona University

“Understanding the origins of life and other problems in astrochemistry with molecular simulations”

Friday March 2nd, 12:00 pm

Dr. Quentin Bailey

Associate Professor, ERAU

“Modern Tests of Einstein’s Relativity”

Friday March 23rd, 12:00 pm

Dr. Brian Crawford

Postdoctoral Research Scientist, Georgia Cooperative Field and Wildlife Research

“Structured Decision Making for Wildlife Conservation”

Friday March 30th, 12:00 pm

Dr. Ted Dunham

Astronomer, Lowell Observatory

Exoplanet Observations with SOFIA and Kepler
